

February 1st, 2005, Redmond, WA - Dr. Oliver Downs, Chief Scientist of Analytical Insights, Inc. will speak to the Puget Sound Council of Teachers of Mathematics on February 7th, 2005. With a talk entitled "What Does a PhD Mathematician do in the Commercial World? Pure and applied adventures from Conventional to Quantum", Dr. Downs will illustrate to the region's mathematics teachers how mathematics comes alive outside the classroom in the fascinating applications in which Analytical Insights, Inc. specializes.

About Analytical Insights, Inc.

Analytical Insights, Inc. specializes in applying abstract analytical ideas from mathematical, physical and statistical science to problems in the real world. The company excels in the use of client data to help make better strategic, operating, and investment decisions; including customer behavior prediction, time-series forecasting, segmentation and cross-sell/up-sell maximization. The company also offers analytical services in mathematical and physical modeling; specializing in Quantum Computation and Machine Learning & Data Mining algorithm design and development.
